PACS

HARD FLOOR CLEANER

Frequently Asked Questions

What ingredients are found in the PACS?

- Sodium bicarbonate
- Citric acid
- Lipase enzyme
- Sodium lauryl sulfate
- Polyvinyl alcohol film
- Fragrances

Do PACS contain any harmful ingredients?

No, Vileda® PACS Hard Floor Cleaners do not include harmful ingredients such as Propyl-paraben, Butyl-paraben, Diethyl phthalates, Formaldehyde, Nonylphenol ethoxylates (NPEs), Triclosan, Toluene, or Trichloroethylene (TCE) that you may find in other floor cleaning solutions. They are designed with 97% naturally-derived ingredients.

How do the enzymes clean my hard floor surface?

The enzymes in Vileda® PACS work by binding and breaking down dirt and grime, leaving your hard floor surface clean and fresh. Imagine enzymes as tiny superheroes with the power to target the dirt particles that make your floors look dull and dirty. This process helps to loosen and dissolve the dirt, making it much easier to mop away.

Vileda® PACS enzymes are derived from natural ingredients, meaning they come from plants and other organic materials. This is why Vileda® PACS can provide a deep clean without any harsh chemicals.

How many PACS should be used?

We recommend using one PAC diluted in 1.6 gallons (6 liters) of warm to hot water. Just one PAC per bucket full of water!

What floor type can I use PACS on?

PACS can be used on all hard finished floor surfaces including hardwood, tile, ceramic, luxury vinyl, laminate, linoleum, marble, stone, porcelain and more. Do not use on unfinished, oiled, waxed wooden floors or any water-sensitive floor surfaces. We do not recommend using PACS on other surfaces like walls or countertops. If unsure, test on an inconspicuous area first.

Do I need to rinse my floor with clean water after use?

No need to rinse. Just mop and allow it to dry. Drop, fizz and mop.

Will the PACS leave a residue on my floor?

If used with the recommended 1.6 gallons of water, Vileda® PACS will not leave any residue on your floors. You won't find any streaks left behind, isn't that amazing?

Can I use the PACS for dishes, laundry, and carpets?

No, PACS are specially formulated for floor cleaning. Do not use them in dishwashers, washing machines, or electrical appliances.

Can PACS be used safely around children and pets?

Yes, PACS are a safe choice in floor cleaning. PACS are formulated with naturally-derived ingredients and do not contain any harsh chemicals. However, remember to keep them stowed away out of reach of children and pets. If swallowed, seek medical attention.

What is the best temperature for PACS to dissolve in?

Using warm to hot water will help dissolve and provide that great fizzing action.

What is the pH level of Vileda® PACS Hard Floor Cleaners?

Neutral, ranging from 6.5 to 7.5. Having a safe pH level in PACS ensures that the cleaning solution is not too acidic or too alkaline. This prevents damage to your floors, and ensures effective cleaning without compromise!

Can I use PACS with the ProMist® MAX Spray Mop?

No, Vileda® PACS are formulated to be used with mop and bucket systems and should not be used in a spray mop.
